

DISPEL ZERO TRUST ENGINE

OT Remote Access That Keeps Operations Running

Eliminate operational friction. Scale securely.
Audit with confidence.

DISPEL

THE CHALLENGE

Three Frictions Slowing Industrial Operations

Legacy VPNs and IT PAM tools were never designed for OT. They create compounding frictions that slow operations and create risk at every access point.

Security Friction

Persistent attack surfaces and session blind spots leave every session unmonitored after login — opening windows for modern AI-driven threats.

Efficiency Friction

Vendor access tickets, IT-centric workflows, and onboarding overhead that delays production and frustrates operators and vendors alike.

Compliance Friction

Manual evidence collection, piecemeal screenshots, and audit scrambles that consume six-figure staff budgets every year.

THE SOLUTION

The Dispel Zero Trust Engine Eliminates All Three

One platform connecting people, systems, and data across complex OT environments — with fast vendor access, continuous session intelligence, and automated audit evidence.

OT SECURE REMOTE ACCESS

Designed for How OT Really Works

- Tiered Connection Suite: Browser, Virtual Desktop, Local App
- Real-time topology map of every facility, gateway, and device
- Moving Target Defense: rotating ephemeral infrastructure
- Vendor self-onboarding in 30 seconds · 65,000+ OT protocols
- Cloud-managed, on-prem, or hybrid deployment

INDUSTRIAL DATA STREAMING

Secure data backbone for AI and predictive maintenance.

- Streams real-time OT data from sensors, HMIs, and control systems
- Machine-to-machine file transfer across industrial fleets
- Zero Trust by default — same access controls and audit trails

DISPEL IDENTITY

Verify the Person, Not Just the Password.

- IAL2 identity proofing — industry first for OT
- Verify the person, not just the credential
- Built for your highest-impact assets

DISPEL INTELLIGENCE

Session Forensics and Risk Scoring.

- Session Forensics with Dynamic Risk Scoring
- Insider Threat analytics surface anomalies before incidents
- 24/7 OT SOC with Google SecOps, Mandiant, SentinelOne

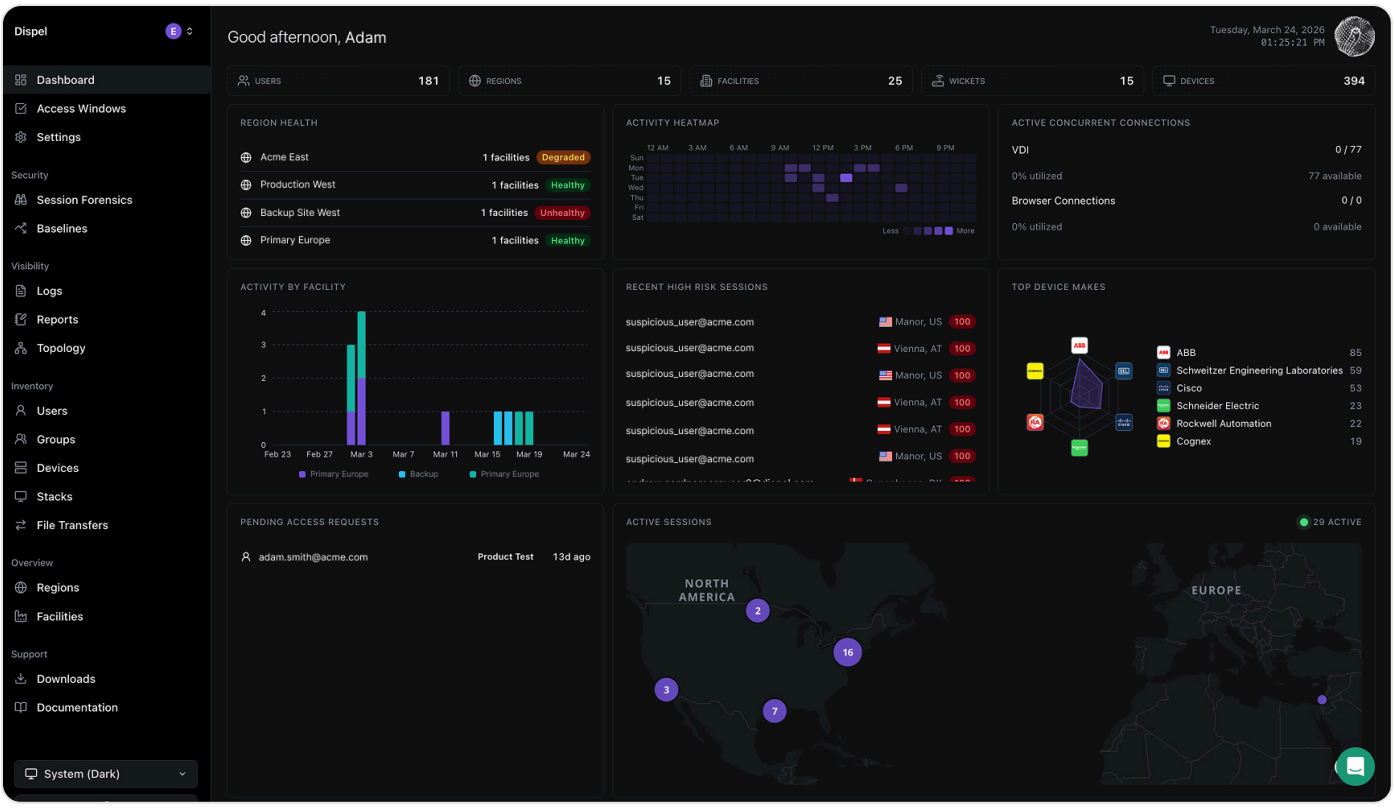

DISPEL COMPLIANCE

Continuous Compliance. Always Audit-Ready.

- Industry's first inherited controls engine for OT
- NERC CIP · NIST 800-53 · NIS2 · IEC 62443
- Automated OSCAL, CSV, PDF exports — no screenshots

THE DISPEL DASHBOARD

Every Connection. One Place.

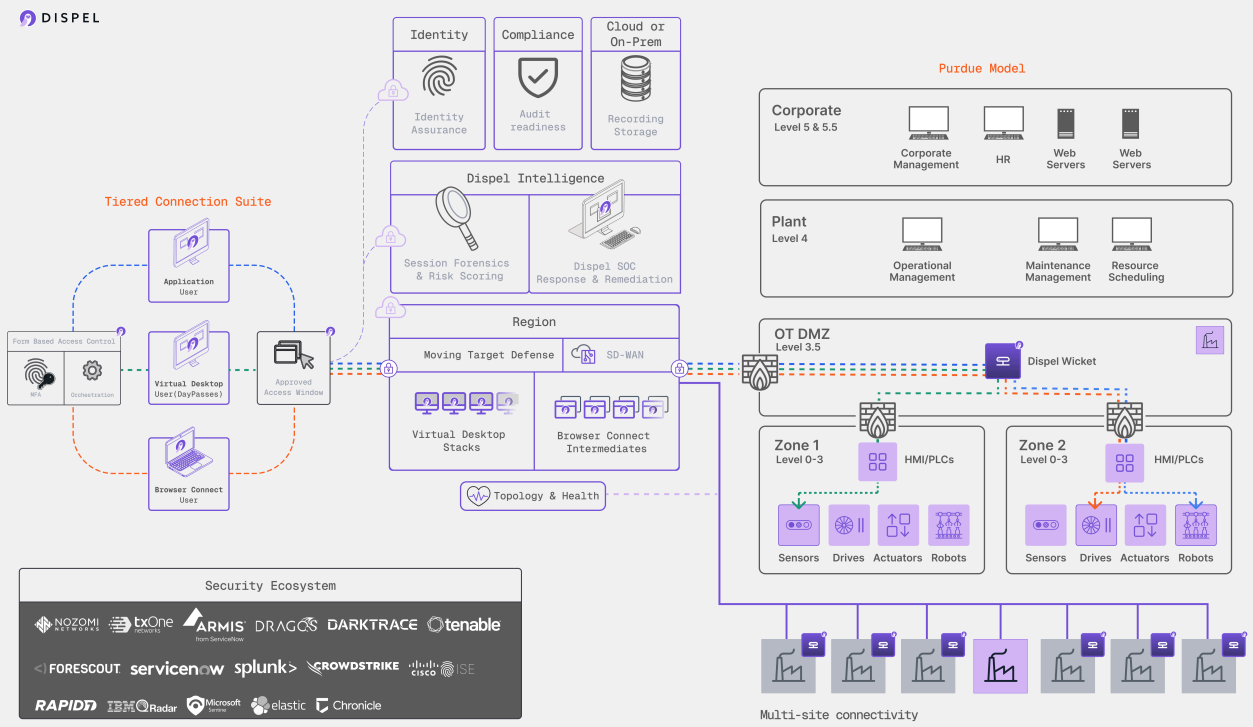

Org and Facility Admins get a complete picture of access activity, session health, and infrastructure status — active connections, recent sessions, user risk scores, and compliance posture, all in one view. Facility Admins see data scoped to the facilities they manage.

TIERED CONNECTION SUITE

Tailored Remote Access for Every Role

Dispel gives you the flexibility to scale remote access up or down for operators and third-party vendors, cutting OpEx and eliminating complexity across every workflow.

RAPID ACCESS

Browser Connect

No client install required.

- Single-use, destroyed after every session
- RDP, SSH, VNC, and HTTPS protocol support
- File transfer with upload and download
- Session recording with over-the-shoulder visibility

VENDORS, OEMS, CONTRACTORS

FULL WORKSTATION

Virtual Desktop

Highest security posture.

- Single-use, destroyed after every session
- Reaches 65,000+ TCP/IP protocols and legacy OT systems
- OEM compatible, incl. ABB, Rockwell, Mitsubishi
- Customizable golden images, on-demand scale

INTERNAL ENGINEERS AND OPERATORS

LEGACY & CUSTOM

Local Application

Lightweight app with posture checking.

- Centralizes control of legacy connections to prevent shadow IT
- Device posture check before access is granted
- Supports software locked to contractor devices
- Access to legacy systems or custom applications

CONTRACTORS, INTERNAL USERS, LEGACY

FLEXIBLE DEPLOYMENT

Deploy the Way Your Environment Requires

The only OT remote access platform built for cloud, on-prem, and hybrid — with zero tradeoffs on capability or security.

CLOUD-MANAGED RECOMMENDED

Fully managed.

Scales instantly. No hardware.

- Go live in 3 hours; scale to 100 sites in 90 days
- Burst capacity for 100+ vendor surges in minutes
- No infrastructure overhead or lead times

ON-PREM · SITE CONSOLE

Air-gap ready.

Full local deployment.

- Network-isolated; air-gapped environments
- Full local deployment via Dispel Site Console
- NERC CIP and regulated utility deployments

HYBRID

Cloud scale.

Local data residency.

- Data residency; mixed environments
- Burst capacity scales remotely
- Sensitive data and sessions stay within your perimeter

WHY DISPEL

Security and Operations Teams Choose Dispel

Dispel wins over legacy VPNs, IT PAM tools, and other OT SRA vendors.

CAPABILITY	DISPEL	LEGACY VPN	IT PAM	OTHER OT SRA
Vendor self-onboarding <30 seconds — no IT ticket	✓	✗	✗	Limited
Multiple connection types — Browser, VDI, Local App	✓ Exclusive	App only	Browser only	Browser only
Moving Target Defense — no persistent IP or attack surface	✓ Exclusive	✗	✗	✗
Supports all 65,000+ TCP/IP protocols incl. proprietary OT	✓	✗	✗	Partial
Session Forensics & Dynamic Risk Scoring	✓	✗	✗	Basic logs
Automated compliance — NERC CIP, NIST, NIS2, IEC 62443	✓ Industry first	✗	✗	✗
IAL2 Identity Proofing — verify the person, not the credential	✓ Industry first	✗	✗	✗
Industrial Data Streaming — AI & PdM ready	✓ Industry first	✗	✗	✗
Flexible deployment — Cloud-managed, on-prem, or hybrid	✓	On-prem	Cloud only	On-prem
OT security integrations — Nozomi, Dragos, Armis, TXOne	✓	✗	Limited	Limited
Consolidate apps & OS across 10–100+ sites	✓ OTFusion	✗	✗	Complex

RESULTS

ANNUAL OPEX SAVINGS	HOURS SAVED MONTHLY	VENDOR ONBOARDING
$42M	200+	30sec

DISPEL

Security That Makes Industrial Operations Run Faster

Gartner® Cool Vendor in Cyber-Physical Systems Security, Dispel delivers security that makes industrial operations run faster — protecting $500B+ in manufactured goods and 54M+ utility users worldwide.
